Our Migration Process

Our process for planning a migration to Power BI

1 Catalogue BI & Data assets
Discovery of customer's BI reporting and data landscape

3 Metadata Insights
Identification of duplicity and redundancy of reporting assets

5 Gap identification and impact assessment
Understand the current business needs and associated gaps along with the impact of rationalization

7 Accelerated Report Migration
Implementation of Power BI reports

2 Consumption Insights
Analysis based on the usage history and organizational hierarchy

4 Asset Rationalisation
Rationalize BI & Data assets based on
- Consumption insights
- Metadata insights

6 Prioritization and Roadmap
Build a roadmap based on the impact assessment and change management

8 Adoption & Governance
Nurture data culture through driving adoption. Implement governance policies to ensure security and stability
